Claims 1-7, 10-18 and 21-30 are again rejected under 35 U.S.C. 102(a) as being anticipated by the patent to Cheong et al. (USP 6,961,300) for the reasons of record.

Since these patents employ the same materials as those claimed by applicants, it is inherent that their respective optical information recording media function in the manner claimed by applicants. The new recitation of "absorbs a light beam and exchanges the light beam into heat ..." is an inherent function of the prior art light absorption material.
